

Crear un link para iniciar una conversación

Información sacada desde [Github](#)

You can directly send the link of the iframe loaded by chatwoot javascript SDK for the user to get a dedicated chatwindow. But with this method, the user session won't be persisted if you are using methods like `setUser`

example

```
# obtain the widget website token from your existing widget javascript
https://{your installation url}/widget?website_token={widget website token }
```
